

4.2.1 Library as Learning Resources Centre

Library is automated using Integrated Library Management System (ILMS) and has digitization facility

Describe the implementation of the automation of the Library and the digitization facility available and used, in maximum of 500 words

The Karnataka State Law University Library is supposed to be the specialized one in the field of law literature. The library has been established in August 2009, so as to facilitate the professional education and research needs of the university faculty and student community. The library has the distinguished reputation of being the best law library in this region. This has been housed with an excellent collection of more than 20,000 books related to law. At the same time sufficient reference books are also available in the library. Digitization improves access to library resources. By digitizing library collections, information will be accessible to all instead of a group of researchers. Karnataka State Law University Library Automated its library 2010 with "e-lib" multiuser software. This software is Multilingual (Supports Unicode) and user friendly GUI (Graphical User Interface) based Library management software which helps to manage the library efficiently. "e-lib" supports MARC-21 and AACR II cataloging, it has effective OPAC and it also supports various technologies like RFID, Bar code and Cloud technology. Every year nearly 120-140 students get enrolled from the library. In this software Books are classified using DDC System. Accession register can be generated by supplier bill, Based on single entry and also Catalogue Card, Book Tag, Book Card and Barcode Labels can be downloaded for single titles Through the software id cards can be generated for Staff, Students and other members. Id cards are designed based of college requirements. Through these id card easy book transaction can be done. At a time all student id cards are generated so Reduces manual work.

"A library is a repository knowledge under the same roof" the statement emphasizes the importance of adequately managing a library. "e-lib" is a multiuser (Client / Server based), Multilingual (Supports Unicode) and user friendly GUI (Graphical User Interface) based Library management software which not only helps to manage the library efficiently but also reduces the cost overheads that occur in library. This software is designed and developed by consulting library professionals, "e-lib" supports MARC-21 and AACR II cataloging, it has effective OPAC and it also supports various technologies like RFID, Bar code and Cloud technology.

Modules
